

## About Nutralso®

### What is Nutralso®?

Nutralso® is a true Nutraceutical ingredient that has been scientifically documented to reduce health risks in nutrient deficient populations. Extracted from the bran layer of rice, Nutralso® is an all-natural nutraceutical nutritional comprised of phytonutrients that possess pharmacological values scientifically documented to mitigate specific chronic health conditions. Our enzymatically hydrolyzed bioactive extract (Nutralso®) provides a balanced base ingredient for product formulation that clinical studies have demonstrated can change the performance paradigm in health and wellness. Our unique and patented technology results in an embodiment of nutritionally enhanced and bioactive macronutrients, micronutrients, antioxidants and vitamins with enhanced bioavailability.

This paradigm changing phytonutrient extraction technology serves as a platform for developing a broad spectrum of bioactive nutritional formulations based on the primary derivative product, Nutralso®. These formulations address specific chronic health conditions such as the many health problems caused by nutrition deficits in Seniors, chronic malnutrition in infants, and insulin resistance in populations experiencing blood glucose imbalances and oxidative stress.

### Nutralso® Contains:

- The highest source of phytonutrients extracted from any cereal grain
- Nearly 37% bioavailable protein (simple proteins - peptides and amino acids)
- 27% fats (inclusive of Omega 3 and 6) and over 80 antioxidants

### Nutralso® Antioxidants:

- 21 Phytosterols
- 12 B-Vitamin Complexes
- 16 Gamma Oryzanols
- 10 Tocopherols / Tocotrienols
- 9 Polyphenols (incl. a-Lipoic Acid)
- 10 Polysacchrides
- 5 Phospholipids
- Omega-3 and 6

Nutralso® is Gluten Free, Non-GMO and Hypoallergenic
